# covetrus impromed®

# version 23.10.0 Release Notes

## WHAT'S NEW

### Rebranding

Introducing Covetrus Impromed®! Impromed has been updated to a Covetrus® branded solution and with this transition comes many visual enhancements to the program.

### CareCredit®

Updated CareCredit to their latest integration protocol.

*Please update Impromed at your earliest convenience to avoid any interruption with the integration.*

## Lab Integrations

| 306361 | When a new lab request is created, the lab request can be linked to individual SOAP sections to provide an accurate record for the patient. |
|---|---|

## Reports

| 294963 | The Controlled Substance Log Export report for Nebraska was updated to meet state requirements. The report is named ASAP 2023 v4.2 - NE PMP. |
|---|---|

## VCP

| 262826 | Given a patient has an active VCP care plan, when the Wellness Plan is opened and a VCP plan is selected, the services displayed can be pushed to the invoice using the Add to Invoice button on the row and the quantity can be adjusted in the prompt displayed.

Staff will be able to adjust the quantity directly from invoicing when adding products which are available in the active VCP care plan. |
|---|---|
| 311493 | Impromed handles the quantity adjustments modified in VCP for optional services when various areas refresh to collect the latest plan details. |
