

# version 23.13.0 Release Notes

## WHAT'S NEW

### Zoetis Reference Labs

Impromed now integrates with Zoetis Reference Labs. Create lab requests for Zoetis Reference Labs from a travel sheet or product attachment. Instructions for setup and workflow are contained within the Impromed Help Text.

### Impromed Universal Lab Reader

Updated the IULR to include Zoetis Reference Labs.

The Zoetis Reference Lab service will only support Impromed database versions 23.12.0 and above.

# USER REQUESTS

## Accounts Receivable

---

234735	Corrected split billing so it is only available when the license is enabled.
--------	------------------------------------------------------------------------------

---

--------	-----------------------------------------------------------------------------

---

## Database

---

286118	The Update Rabies button in the Certificate module has been changed to Update Vaccines and the new rabies tag updates all fields properly.
--------	--------------------------------------------------------------------------------------------------------------------------------------------

---

## Desktop

---

332204	The backspace key will function as expected and not go back a page when the user is in Pendo.
--------	-----------------------------------------------------------------------------------------------

---

## Estimates

---

46704	The transfer from estimates to invoicing will prompt for wastage when inventory items are configured to do so after the move screen.
-------	--------------------------------------------------------------------------------------------------------------------------------------

---

# USER REQUESTS

## Invoices

---

318229	Impromed will be able to email invoices from history if the client has * in the name.
--------	---------------------------------------------------------------------------------------

---

## Lab Integrations

---

332380	Performance improvements have been implemented to the lab request screen.
318326	Pricing is correct for the IDEXX Reference Lab request if the mapped Product is a bundle (when creating requests from the Lab module).
330718	Corrected the PIMS ID not found error when creating an AXIS-Q request.
334963	A duplicate request will not be created when making a new IDEXX Request for a product with the 'Create Lab Request' Product Attachment.
336138	Editing an IDEXX Reference Lab order that was created from Product Attachments will add the correct Date Performed.

---

## Medical Records

---

312253	When adding images to medical record forms, the images will display on the form.
--------	----------------------------------------------------------------------------------

---

# USER REQUESTS

## Message Center

---

333960	Performance in the Message Center has been improved for faster paging.
--------	------------------------------------------------------------------------

---

## Prescriptions

---

337929	When printing a written prescription and the format for Dual Signature is selected and the new option of “Display ‘Dispense as written’ on the left” is enabled, the prescription template prints the details like normal with the signature details flipped.
--------	---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

---

## Products

---

49168	Client and Patient notes generated from Product Attachments will display after an item has been concluded.
-------	------------------------------------------------------------------------------------------------------------

---

## Reports

---

58758	Accounts receivable-based issues with Removed Payments, when a product was paid off by multiple payments, will display correctly on the Employee Commissions Report.
334886	Accounts receivable-based issues with Removed Payments, when multiple products are on the invoice and requires the payments to be split, will display correctly on the Employee Commissions Report.
327101	Updated the Controlled Substance Log export for NH to handle updated state requirements.

---

# USER REQUESTS
