End of Life for Vetlogic

VetLogic was a method to transmit and receive digital information. This method is being replaced with a new solution and VetLogic, via the Avimark Sync Service, must be disabled.

Avimark Sync Service

To disable VetLogic for Avimark, it is necessary to change the Avimark Sync Service from True to False.

- 1. In Avimark, click 📶 to open Options Maintenance.
- 2. In the Search bar, type sync to display Avimark Sync Service.
- 3. Select Active.

🕏 Options Maintenance			\times
<u>F</u> ile <u>E</u> dit <u>V</u> iew <u>H</u> elp			
Search sync			
- Options - Avimark Sync Service - Active - Avimark Sync Account Number - Contact Name - Password Username			
Values Security			
Default Value True	Change		
Sito Valuo		_	
		🗸 ()one
			1

- 4. Click Change.
- 5. Change True to False.
- 6. If a warning displays to confirm disabling the Sync Service, click Yes.
- 7. Click **Done** to close Options Maintenance.
- 8. Close all instances of Avimark on all computers until the remaining steps are complete.

9. On the server, locate the shortcut to Avimark Guardian then right-click > Run as Administrator.

10. The Avimark Server Guardian window opens.

- a. Click Stop the Service.
- **b.** Click **Run**.
- c. Click Start the Service.
- d. Click Run.

11. Log back into Avimark.
