

Avimark® version 22.10.2 Release Notes

WHAT'S NEW

Internal Document Writer

This word processing feature is now included with Avimark to create, edit, and print documents and is free of charge. In addition, printing will be done through the Document Writer to alleviate any problems printing through a commercial word processing program.

- Set the default to use the Internal Word Processing option in Hospital Setup.
- Avimark will print using the internal word processing integration.
- The Document Writer limitation is the inability to be used for creating forms with Controls (check boxes, drop-down lists, etc.).

VCP Care Plans

Phase three of the integration with VCP brings additional enhancements to Avimark and the VCP Care Plans. Below is the newest developments for this release.

Clinic's Access to VCP Portal

Clicking the VCP button on the speed bar will open the VCP portal. If the active patient has a VCP Care Plan, VCP will open to that patient's VCP Care Plans.

VCP Care Plans - Courtesy Rates

Each VCP Care Plan can have a courtesy rate that would be applied to items not included in a plan.

Items not included in a VCP Care Plan will receive a courtesy rate discount setup through VCP. The rate is imported into Avimark.

Email Estimate Documents

Estimates can be emailed and, if a signature device is attached, the program will prompt for a signature and attach the estimate document to the email.

- The option to Send e-mail is available on the estimate right-click shortcut menu or from the Patient Estimate window.
- If a signature device is attached to the workstation, a prompt will appear to sign the estimate.
- There is an option to preview the attachment from the right-click menu on the attachment.
- The estimate will attach as a PDF in the Send e-mail window.
- If there is a signature captured, it will save the estimate document in the patient's attachment window.
- An advanced option is available to create a default Subject line for the estimate email.

Security

There is now an unlimited length and special characters are allowed for passwords. Passwords are no longer stored in Avimark. Passwords cannot be retrieved. Passwords can be changed through the Logon window or a new password can be entered under **Work with > Users and Security**.

Performance Benchmark

Performance Benchmark is a utility that will assist Support when troubleshooting Avimark for a clinic.

- The utility will run through statistics on the workstation it is running on.
- Performance Benchmark will show statistics for adding records, updating, and reading records and files, plus deleting records.
- When the utility is finished running, a screenshot can be saved to the Clipboard and sent to Support.

Avimark extras

261859	Optimized Avimark due to performance issues.
70940	MED08 Change Inventory Used was corrected.
59138	Patient specific reminders are not altered if Medical History is moved to a new patient.
9281	Performance improved when changing patient gender and updating patient reminders.
249819	The added item to the table at System Tables is displayed at the drop-down list related to the table at another AVimark client window.
205525	When Special Fees are changed in System Tables it updates the special fee when already attached to an Inventory item so that a rebuild of Inventory and System Tables is not required.
261671	The Markings drop-down list displays the Equine Markings setup in Work with > System Tables > Equine Markings.
261630	The patient window loads faster regardless of species.
264242	Importing IDEXX Reference Laboratories Treatments was enhanced to allow new codes.
150783	Declined entries print DECLINED when the Medical Condition is printed.
277335	Logging for AXIS-Q service implementation will not slow down Avimark or any integration.
175130	The Assertion Failure error has been corrected when selecting SMS First, Second, and Third reminder.

58343	Removing the ANTECH requisition line from Medical History is removing the entry from Requisition Management.
271956	Dental Chart text will contain all information as it was prior to updating to 20.10 or higher versions.
264812	Using drag and drop to move an appointment to the (Not Assigned) column will not cause a message regarding Telemedicine setup.
87809	During the update of Avimark, there will be a check on the codes in the IDEXXVLS table to add any missing codes.
155175	The VetEnvoy integration is deprecated and disabled.
9900	Requisition Management shows previously imported results as imported.
273420	Removing AXIS-Q Requisition Line from Medical History is removing the entry from Requisition Management.
81656	If an IDEXX lab test is entered, the test is placed in Medical History once, no duplicate charges.
8323	The label Order Code ID was changed to Order Code.
249446	An error message no longer appears when selecting Another for Glossary item after typing its code in Find field.
259201	Treatments no longer generate a WP error when selecting the Plan Entries tab after adding Comments/Doctor's Notes.
9587	Clinics are able to send more than 10 items to Covetrus North America shopping cart without error.

271734	The \$ Lookup button will remain above the CNA Cost column.
269477	Appointment group is holding when refreshing the Avimark window.
273419	When a bad analyte is found, a detailed message will display the cause.
70791	The purchase order will show the correct quantity of an item as it relates to Order Qty and Order Point.
202472	The correct weight conversion is sent over to Sound Digital Imaging.
155175	Removed direct VetEnvoy integration from Avimark.
288207	Enabled spell check in Internal Document Writer.
286495	Separated Chromium into DLL, updated name to AvimarkChromium.dll, updated Copyright and version information.
289441	Updated Review tab in Internal Document Writer to hide/disable permissions/protecting options.
292360	Updated VCP phone number and email in sign up messages.
287881	Message added that "Internal Document Writer" could not prepare attached documents in ".doc" format for emailing.
290595	Corrected merge word <rf-address> not pulling correctly in Avimark.</rf-address>
284718	Removed eminder integration from Avimark.
289095	Corrected price entered into Medical History when Item without the A action code is sent to Covetrus Rx Management.

290423	Corrected Patient Chart with merge words in MCR notes generates too many pages.
296417	Corrected error and Chronological tab missing in Medical History if the user drags a tab around.
297653	Corrected the inability to send Estimate email with StarOffice/OpenOffice selected in Hospital Setup.
297318	Corrected the missing packed record from the device file.
297559	Removed extra calls made that were not necessary when opening the Appointment Calendar.
154339	Corrected Worklist not defaulting to the selected patient.
298915	Corrected Estimate entry not holding change if hitting Enter.
300060	Disabled advanced caching for needs list.
296417	Corrected error and Chronological tab missing in Medical History if the user drags a tab around.
298147	Corrected Spell Check window not prompting when in Medical Condition Record.
297244	Corrected Medical Condition Record freezing when scrolling.
287960	Corrected wrong appointment selection in Appointment Calendar.
290610	Corrected TAVIComboBox text remains selected when focus is lost.
297621	Implemented Hang detection in Avimark.exe advanced logging.
292278	Updated TN ASAP with their new changes.

299555	Enhanced Details tab for MinionCalls.exe, Upgrade.exe, and AvimarkGuardian.exe.
297569	Improved the Default Reminders procedure.
298754	Created caching on AvimarkServer for Reminder.
282021	Exporting the Time Card Report to Excel with Summary Report unchecked, the report includes Employee name as title.
285675	Built into Avimark.exe and AvimarkServer and optimized the WhathasAvimarkOpen Utility.
297188	The default value was changed from True to False for a/o Delete entry from IVLS Pending list.
300971	Updated link for EULA in Upgrade.
304342	Corrected Assert Error during Rebuild EntryHistory Indexes.
289102	Corrected issue with viewing Closed Time Card entries from the Time Card window .
303535	Corrected Access Violation accessing VPR formulary/Easy Update scheduling assistant/ Requisition Results using Chromium.
68745	Corrected First discount plan class not holding when patient is on multiple Wellness Plans.

VCP

300175	Implemented a way to import plans from VCP that did not start from within Avimark.
297665	Corrected Sync Plans window prompting each time a patient is checked-in.
299740	Corrected users needing ADM24 to not receive errors when logging into Avimark with VCP activated.
299747	Avimark will not show patient as having unposted medical history after VCP plans are imported.
300444	Changed default settings in Advanced Options for VCP.
302061	Accounting check will not bring back removed medical history entries.
