

AVImark Release Notes

Version 19.21.1

What's New

AVImark has integrated the use of telecommunications in order to provide patient health care at a distance. Telemedicine helps work around distancing and can improve access to veterinary services that may not be otherwise available to clients.

► **Telemedicine**

- ✓ Create an appointment for the client and patient. Convert the standard appointment to a virtual visit by clicking the button, **Create Link**.
- ✓ Email the link to the client. The link in the email provides the way for the client to join the meeting.
- ✓ At the time of the scheduled visit, right-click on the appointment from the calendar or Schedule tab, then launch the visit.
- ✓ Virtual visits can be recorded and saved to the computer.
